Serve your guests wherever they choose to play

Online casino, e-sports, digital lottery and on-premise mobile are just a few of the emerging ways that the gaming experience is being extended online. New legislation, new ways to play, and new ways to connect digital and physical properties are creating new opportunities for Gaming Entertainment leaders. Our VIP LightSpeed® platform helps our clients connect the online and brick and mortar gaming experiences, making account funding easy.

One e-check offering for online and offline

Our VIP Preferred® e-check network — with millions of registered users — is not only available across more than 400 North American casinos, it's also available online. This enables your guests to quickly and easily access funds from their checking account without having to re-enroll, with the same limits and terms available to them at the cage.

Solutions for every emerging vertical

Pavilion Payments is working every day to help our clients capitalize on the emerging opportunities from digital gaming. We offer solutions for every emerging vertical.
