

VIP Mobile Jackpot with Benefits for Everyone

VIP Mobile Jackpot enables casinos to process jackpots in less than 5 minutes by using a mobile tablet Smart App and the VIP LightSpeed Kiosk.

Using a small but multi-purpose portable device, attendants can monitor jackpots and immediately make their way to the slot machine, verify the jackpot, and collect the patron's information electronically. Once verification and patron information collection is complete, the attendant can use the device to load

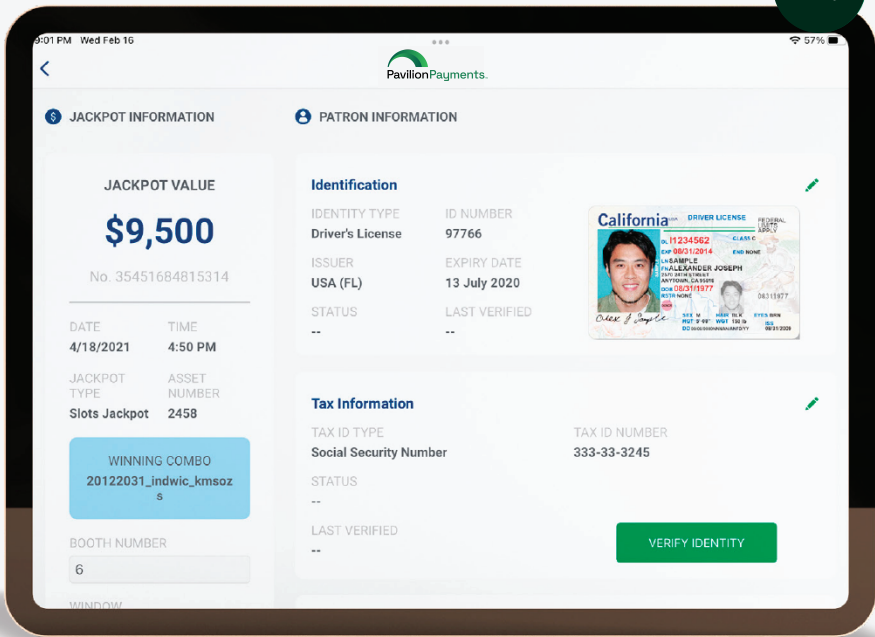

the jackpot value to the patron's VIP Mobility ledger in mere seconds or use the closest kiosk to process a cash payment or obtain a voucher. This ensures the most efficient payment processing experience can allow your patrons to return to gaming far quicker than before.

All-In-One Kiosks | VIP Mobile Jackpot
