

VIP Mobility

Revolutionizing Cashless Gaming

Cash's Reign is Over

As cash loses popularity worldwide, players seek greater flexibility and convenience. Yet, cash still dominates gaming floors, causing inefficiencies and security risks. VIP Mobility offers a modern, cashless gaming solution for a smoother transition.

A Seamless Mobile Funding Solution

VIP Mobility transforms gaming by enabling patrons to use mobile devices for transactions. Guests can create digital TITO tickets, link VIP Preferred eCheck accounts, and pair devices with any slot or table game using a QR code. They can reload funds and cash out easily, without handling physical cash.

Key Benefits

- Lower cash handling costs by reducing cash transactions
- Keep more money circulating on the floor
- Minimize implementation costs with simple integration
- Improve operational efficiency with enhanced performance metrics
- Ensure uninterrupted play with no pauses for cash handling

Safe, Secure, and Responsible

VIP Mobility enhances security and adheres with gaming regulations:

- Better identity and age verification with automated player tracking
- Additional checks to prevent fraud with robust AML controls
- Enhanced responsible gaming with configurable limits, cooling-off periods, and self-exclusion options

Efficient Integration

VIP Mobility integrates seamlessly with Pavilion Payments' LightSpeed® kiosks, needing only minimal updates to bill validators and ticket printers—unlike other solutions that require major technological overhauls.
